

Project Manager | Location: TLV | Some International Travel

Language Requirements

Fluency in English

Your Role

As a Project Manager at SightDx you will lead R&D projects at all stages of product life-cycle in a hands-on managerial and technical role.

Working with the R&D team you will plan, oversee execution and monitor projects to ensure focused effective work and on-time delivery. In your day-to-day role, you will:

- Lead overall project efforts from conception, through research and development, to market.
- Work with internal and external stake-holders to perform focus and direct project efforts.
- Work with our Product Team to define and shape future products, features or applications.
- Work with algorithm, software and hardware teams to develop new features and applications.
- Document project life cycle as required

Your skills, experience, and potential

- Technical (Scientific or engineering) background
- Over 5 years R&D experience in medical devices
- Over 2 years project management experience, preferably in medical devices
- Can work independently with minimal supervision
- Can handle multiple projects and changing priorities
- Knowledgeable about design control and project life-cycle

Sight Diagnostics

The faster we diagnose, the faster we can treat. At Sight Diagnostics, we aim to improve health through faster and pain-free diagnostic testing.

Sight's latest analyzer, OLO, performs a Complete Blood Count, the most commonly ordered blood test, in minutes, not hours. It's compact, designed to be used by anyone, anywhere.

Sight's method, developed over a decade of research, represents a step-change in diagnostic technology. Our products create a digital version of your blood, by

capturing 1,000 highly detailed images of a finger prick sample, which is then analyzed by our proprietary algorithms. Sight's first product was focused on detecting malaria, used in 24 countries, and has delivered almost 1 million tests to date.

At Sight, exceptional individuals work together to achieve extraordinary things. We have rapidly growing offices in London, Silicon Valley, and Tel Aviv.
